opticwash

ONLINE MEDIA

Opticwash is a Florida-based kiosk technology company, that has developed the world's first fully-automated self-serve kiosk that cleans and removes 99% of bacteria on eyewear, jewelry, watches, and smart phones. State-of-the-art sensor technology effectively detects, completely cleans and dries the item in less than two minutes.

Opticwash is extremely easy-to-use and can literally be placed anywhere - malls, offices, hotels, airports etc. Opticwash is an efficient AND entertaining solution to cleaning a smart phone, which the average consumer touches 2,617 times each day and are 15 times as dirty as a public restroom toilet handle.

opticwash

CLOSED WATER FILTRATION

- 5 gallon water capacity
- Easy to change water
- No chemicals
- Safe for the environment
- No water connection or drain required
- Simply change water once per month

General Description

The opticwash systems are environmentally friendly using only pure water (Reverse-Osmosis without chemicals) and low pressure to clean optic-eyewear, all forms of jewelry/watches and water resistant cellular phones in a semi-automatic self-service kiosk system.
